Career Objective

Computer Science student passionate about Full Stack Web Development and Android Development.

Motivated to build secure, scalable, and user-friendly applications using modern technologies. Focused on developing practical solutions that integrate strong backend logic with intuitive interfaces.

Proficient in deploying and managing full stack applications on different hosting environments. Seeking opportunities to apply skills in both web and mobile development projects.

Education

Faculty of Computer and Information Sciences, Mansoura University

Bachelor of Computer Science

Trainings

Android Application Development Training (Current)

Digital Egypt Pioneers Program (DEPI), Egypt

June 2025 – Present

- Developed Android apps using Kotlin and Jetpack Compose.
- Applied Android security principles and UI/UX best practices.
- Practiced version control, team collaboration, and functional documentation.

National Telecommunication Institute (NTI), Egypt

June 2025 – July 2025

- Completed Network Infrastructure training program.
- Gained knowledge in network design, implementation, and security.

Technical Skills

- Web Development: Node.js, Express.js, HTML5, CSS3, JavaScript (Vanilla JS)
- Backend / Serverless: Vercel Functions, Google Sheets API, RESTful APIs, Environment Variables
- Mobile Development: Kotlin, Jetpack Compose
- Security: Password Hashing (bcryptjs), Access Control (Admin/User Roles), CORS Handling
- Deployment & Hosting: Vercel, Firebase Hosting, Nginx Server Configuration
- Tools & Platforms: Git, GitHub, Vercel, Firebase, Google Cloud Console
- Concepts: OOP Principles, Problem Solving, Database Design, Responsive Design
- Soft Skills: Communication, Teamwork, Leadership, Time Management, Adaptability

Work Experience

Freelance Web Developer

Khamsat & Mostaqi

- Completed 7+ freelance projects with 5-star ratings.
- Built and deployed 6 full-stack web platforms for real clients.
- Specialized in backend automation, deployment, and website hosting solutions.
- Delivered projects on time while maintaining high-quality standards.

Projects

Anwar Al-Rajhi Platform – Full-Stack Web Application

- Developed a full-stack web application with interactive user interface and admin panel for real-time content management.
- Built a responsive single-page application (SPA) with animations and interactive project carousel.
- Integrated Firebase Firestore with real-time listeners for instant data updates; implemented full CRUD functionality in the admin panel.
- Managed images using Cloudinary to optimize performance and reduce load times.
- **Technologies:** Node.js, HTML5, CSS3, JavaScript, Firebase, Cloudinary

File Upload Web Platform (WesamFiles)

- Developed a full stack web platform using Node.js and Firebase.
- Implemented secure file upload and management features.
- Built a responsive admin dashboard for content and user management.
- Deployed the platform live with domain configuration and Nginx setup.

Smart Digital Library Management System (Al-Farabi Digital Library)

- Built a complete digital library system to manage borrowing, returning, and reservation operations using Node.js Serverless Functions.
- Integrated Google Sheets API as a lightweight backend database.
- Implemented secure authentication and admin approval with bcryptjs and role-based access control.
- Migrated from Google Apps Script to Vercel Functions, resolving CORS issues and improving reliability.
- Designed a responsive frontend using HTML5, CSS3, and JavaScript with real-time notifications.
- Structured modular APIs for concurrent data updates and efficient processing.

Additional Information

- Participated in Problem Solving sessions at university with team collaboration.
- Achieved over 150K+ reach on social media platforms through technical and creative content.
- Experienced in deploying full stack applications on different hosting platforms.
- Continuously learning modern web and mobile technologies to enhance scalability and usability.
